VanishPoint®
Blood Collection Sets

Reduces the risk of needlestick injuries during blood collection
Provides automated in-vein retraction and one-handed activation, effectively reducing the risk of needlestick injuries. Upon needle retraction, the tubing is clamped, reducing the risk of exposure to blood.

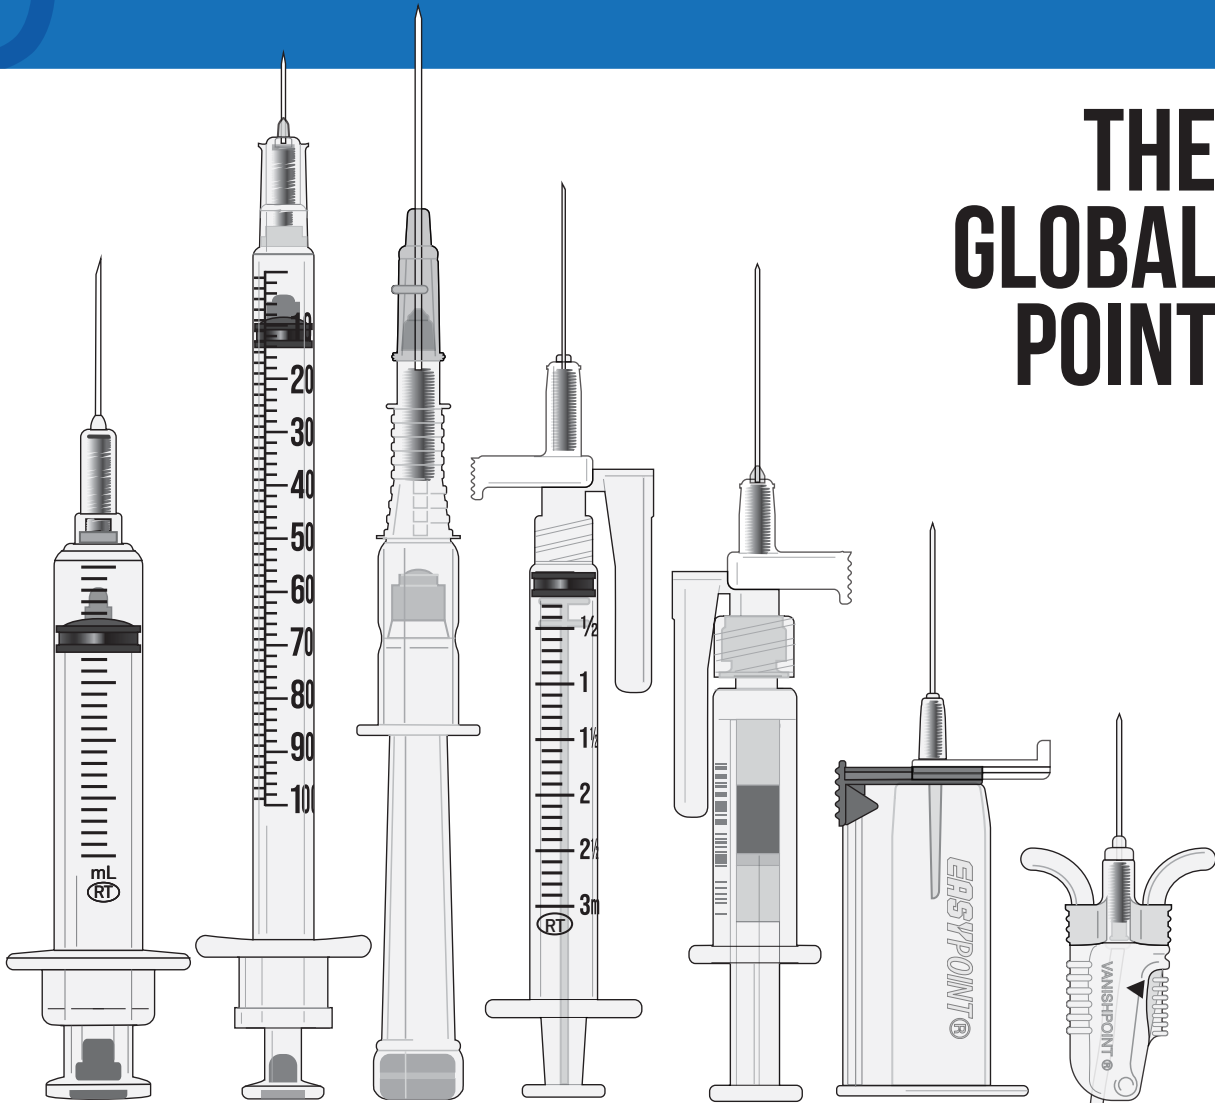

VanishPoint® IV Catheters
A safety IV catheter with our patented automated retraction

It is easy to use and allows for one-handed activation. Does not require additional components such as sliding sheaths, metal clips, or activation buttons.

RETRACTABLE
TECHNOLOGIES, INC.®

VanishPoint®

easypoint

RTI's VanishPoint Syringe is easy to use, requires no additional steps, and allows for single-handed, passive activation. After retraction, it requires less disposal space than other safety syringes and prevents disposal-related needlestick injuries. It is available in various sizes, and with a variety of needle gauges and lengths.

SAVES
MONEY,
TIME &
LIVES

The EasyPoint Retractable Needle features automated pre-removal retraction that has made RTI products the industry standard. This product can be used with luer lock, luer slip, or pre-filled syringes.

MONEY

Most syringes contain residual medication after use, and that medication is wasted. VanishPoint low dead space (LDS) syringes minimize medication wastage and may allow you to obtain extra doses from multi-dose vials, while providing precise and accurate dose delivery to patients. Activated VanishPoint syringes and EasyPoint needles require less disposal space than most other safety needles/syringes reducing waste management costs.

TIME

Automated retraction devices save time by streamlining workflow. By improving efficiency and safety, automated retraction saves valuable time.

LIVES

Retractable Technologies is dedicated to designing and producing products that create a safer environment for clinicians and patients. By using our safety products, healthcare facilities can substantially reduce the risk of needlestick injuries to employees, along with reducing costs.
